WhiteBoard
Joel's Individual Report

1 Qualitative

1.1 Proposals and Reports

I am the primary author of the proposals and the reports. I wrote all the LaTeX code (of course, I didn't write all the prose; I wrote some and copied in what my teammates wrote), and most of the prose in each of the documents. I estimate this to be around 1-2 pages total, although I'm horrible at estimating, so that could be way off.

1.2 Organization

I've been the primary organizer of the code, and I'm the best at Git in the team, so I do much of the merging of code.

1.3 Database

I was one of the primary database designers. We only had minimal database changes after the initial designing, so we did a quality job designing it initially.

1.4 Front-end Coding

I wasn't as active in this area, but I did do some minor fixes here.

2 Quantitative

2.1 Hours

On average, I think I spend 2 hours per week on this project, but this varies very much week to week.

2.2 Commits

Not including merge commits, I have done 69 commits so far that have gone into the master branch.

2.3 Lines of Code

I have written approximately 7792 and removed approximately 7804 lines of code. This is mostly based what Github has recorded, with some manual adjustment as necessary.
